

D-Stain

Commercial Laundry Chlorine Destainer

Description

D-Stain is a highly concentrated sodium hypochlorite stain removal solution for use in commercial laundry applications. This product contains chlorine bleach and should be used only on whites. This product is intended to be used in a bleach cycle after the detergent cycle.

Directions for Use

D-Stain is designed to be automatically dispensed from the shipping container. Concentrations should be set up, adjusted, and monitored by a trained service professional to ensure best results. Available chlorine should be tested towards the end of the first rinse cycle to ensure the available chlorine is at 200 ppm. Proper stain removal will not be achieved if available chlorine level is too low, and fabric degradation will occur if chlorine level is too high.

Do not use on colors, nylon, wool, silk, or other fabrics harmed by chlorine bleach.

NOTE: This product degrades with age. Increase dosage if necessary to obtain the required level of available chlorine.

Safety Cautions

- Keep out of reach of children
- Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Safety Data Sheet (SDS). The label and SDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.

Features & Benefits

- Highly concentrated
- Works in hard or soft water
- For whites only
- Removes stains
- Commercial laundry use only
- Biodegradable

Specifications

Appearance:	Yellow liquid
Odor:	Chlorine
PH:	12-13
